To direct the Occupational Safety and Health Administration to issue an occupational safety and health standard to protect workers from heat-related injuries and illnesses.

IN THE SENATE OF THE UNITED STATES

Mr. Brown introduced the following bill; which was read twice and referred to the Committee on _________

A BILL

To direct the Occupational Safety and Health Administration to issue an occupational safety and health standard to protect workers from heat-related injuries and illnesses.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND FINDINGS.

(a) SHORT TITLE.—This Act may be cited as the “Asuncion Valdivia Heat Illness and Fatality Prevention Act of 2021”.

(b) FINDINGS.—Congress finds the following:

(1) Excessive heat exposure poses a direct threat to workers and the economy. Climate change
increases this danger, as 19 of the 20 hottest years on record have occurred since 2001. Rising temperatures are projected to cause an increase in heat-related workplace injuries and illnesses, a dramatic loss in labor capacity, and decreased productivity.

(2) On average, 3 times as many people die from extreme heat in the United States each year than from hurricanes, floods, and tornadoes combined.

(3) Heat-related illnesses can arise when high temperatures rise above the capacity of the body to dispel heat. Impacts range from comparatively minor problems such as heat cramps to severe afflictions such as organ damage, heat exhaustion, stroke, and death.

(4) Heat stress and COVID–19 are individually dangerous to workers and can interact, making some work environments especially hazardous. Respiratory infections, such as COVID–19, and the use of protective equipment, like face and skin coverings, can increase susceptibility to heat exhaustion and heat stroke. Moreover, the symptoms of heat stress and respiratory illnesses may overlap in ways that exacerbate the diagnosis and pathophysiology related to these potentially fatal conditions.
(5) The current scientific evidence, rate of vaccine production and distribution, racial and socioeconomic inequities in vaccine access, mistrust of science messengers, and levels of international and national preparedness, indicate it will take months to years to achieve herd immunity from COVID–19. Moreover, only long-term study will reveal if vaccines sufficiently protect communities from all strains of this coronavirus. Accordingly, workplaces must continue to guard against COVID–19 and other communicable illnesses well into the future, especially in high-density workplaces that expose employees to stressors that include unhealthy levels of heat.

(6) Jobs at highest risk of heat stress illness and death are disproportionately held by Black and Brown workers, a disparity that reflects the racial injustice inherent in our economic system.

(7) Farmworkers and construction workers suffer the highest incidence of heat illness, but all outdoor and indoor workers employed in excessively hot and humid environments are at significant risk of material impairment of health or functional capacity.

(8) Asuncion Valdivia was a California farmworker who died of heat stroke in 2004 after picking grapes for 10 straight hours in 105 degree tempera-
tures. Instead of calling an ambulance, his employer told his son to drive Mr. Valdivia home. On his way home, he started foaming at the mouth and died.

(9) While heat stress is often associated with outdoor jobs, some indoor workers are also at risk from dangerously high temperatures. Indoor heat stress is prevalent in enclosed workplaces without climate control or adequate ventilation, such as warehouses and factories, and workplaces with heat-generating machinery such as steel mills, electrical utilities, bakeries, commercial kitchens, and laundries.

(10) People working in excessive heat suffer diminished mental acuity and physical ability, which increases the risk of accidents. Heat-related injuries and illnesses increase workers’ compensation costs and medical expenses.

(11) The costs of lower labor productivity under rising temperatures is estimated to reach up to $160,000,000,000 in lost wages per year in the United States by 2090 according to the 2018 National Climate Assessment. The drop in productivity decreases income for employers and workers. Global gross domestic product losses from heat are pro-
jected to be greater than 20 percent by the end of this century.

(12) Every year, thousands of workers become sick and some die from exposure to heat. Between 1992 and 2017, 815 United States workers died from heat and almost 70,000 were seriously injured. These numbers are generally understood to be gross undercounts because many heat-related illnesses and deaths are blamed on natural causes.

(13) Workers have a legal right to a safe workplace. The vast majority of heat-related workplace deaths and illnesses can be prevented by access to water, rest, and shade. Many employers don’t provide these simple measures for workers according to the Occupational Safety and Health Administration.

(14) Employers often retaliate against employees if they report or seek assistance due to problems with heat. Many employees are therefore afraid to report problems and face increased risk of heat-related illnesses or death.

(15) In the absence of a Federal standard, multiple branches of the United States Armed Forces—including the Army, Navy, Marine Corps, and Air Force—have issued heat prevention guidelines, and several States—California, Washington, and Min-
6

WIL21328 410

S.L.C.

nesota—have issued heat prevention standards. The
National Institute for Occupational Safety and
Health (‘‘NIOSH’’) issued criteria for such a stand-

(16) Congress created the Occupational Safety
and Health Administration to ensure safe and
healthful working conditions by setting and enforc-
ing standards pursuant to section 6 of the Occupa-
tional Safety and Health Act of 1970 (29 U.S.C.
655). Employees are exposed to grave danger from
exposure to excessive heat. The Occupational Safety
and Health Administration must develop a standard
to protect workers from the significant risks of heat-
related illness and death.

SEC. 2. OSHA SAFETY STANDARD FOR EXPOSURE TO HEAT
AND HOT ENVIRONMENTS.

(a) Proposed Standard.—Not later than 2 years
after the date of enactment of this Act, the Secretary
shall, pursuant to section 6(b) of the Occupational Safety
and Health Act of 1970 (29 U.S.C. 655(b)), promulgate
a proposed standard on prevention of occupational expo-
sure to excessive heat.

(b) Final Standard.—Not later than 42 months
after the date of enactment of this Act, the Secretary shall
promulgate a final standard on prevention of occupational exposure to excessive heat that shall—

(1) provide no less protection than the most protective heat prevention standard adopted by a State plan that has been approved by the Secretary under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) and, at a minimum, include the requirements described in section 3; and

(2) be effective and enforceable in the same manner and to the same extent as any standard promulgated under section 6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655(b)).

(e) INTERIM FINAL STANDARD.—

(1) IN GENERAL.—If the proposed standard described in subsection (a) is not promulgated within 2 years after the date of enactment of this Act, the Secretary shall promulgate an interim final standard on prevention of occupational exposure to excessive heat not later than 2 years and 60 days after such date of enactment—

(A) to require covered employers to develop and implement a comprehensive workplace excessive heat prevention plan to protect covered
employees from excessive heat that may lead to
heat-related injuries and illnesses; and
(B) that shall, at a minimum—
   (i) provide no less protection than the
   most protective heat prevention standard
   adopted by a State plan that has been ap-
   proved by the Secretary under section 18
   of the Occupational Safety and Health Act
   of 1970 (29 U.S.C. 667);
   (ii) establish requirements for covered
   employers with respect to—
      (I) exposure limits that trigger
      action to protect covered employees
      from heat-related illness;
      (II) hydration;
      (III) scheduled and paid rest
      breaks in shaded or climate-controlled
      spaces;
      (IV) an acclimatization plan;
      (V) exposure monitoring, and
      other measures to prevent exposure to
      heat above safe limits;
      (VI) covered employee and super-
      visor training;
      (VII) hazard notification;
(VIII) an emergency medical response plan;

(IX) heat-related surveillance recordkeeping; and

(X) procedures for compensating covered employees paid on a piece rate basis for required heat-related rest breaks;

(iii) take into consideration the Criteria for a Recommended Standard: Occupational Exposure to Heat and Hot Environments published by the National Institute for Occupational Safety and Health in 2016; and

(iv) include a requirement to protect covered employees of covered employers from discrimination or retaliation for exercising the rights of covered employees under the interim final standard.

(2) APPLICABILITY OF OTHER STATUTORY REQUIREMENTS.—The following shall not apply to the promulgation of the interim final standard under this subsection:

(A) The requirements applicable to occupational safety and health standards under section
6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655(b)).

(B) The requirements of section 553(c) of chapter 5 and chapter 6 of title 5, United States Code.

(C) The requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(3) EFFECTIVE DATE OF INTERIM STANDARD.—The interim final standard shall—

(A) take effect on a date that is not later than 30 days after the promulgation of such standard, except that such interim final standard may include a reasonable phase-in period for the implementation of required engineering controls that take effect after such date;

(B) be enforced in the same manner and to the same extent as any standard promulgated under section 6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655(b)); and

(C) be in effect until the final standard described in subsection (b) becomes effective and enforceable.
SEC. 3. REQUIREMENTS FOR FINAL STANDARD ON PREVENTION OF OCCUPATIONAL EXPOSURE TO EXCESSIVE HEAT.

(a) IN GENERAL.—The final standard promulgated under section 2(b) shall, at a minimum—

(1) take into consideration the Criteria for a Recommended Standard: Occupational Exposure to Heat and Hot Environments published by the National Institute for Occupational Safety and Health in 2016;

(2) establish requirements for covered employers with respect to—

(A) exposure limits that trigger action to protect covered employees from heat-related illness;

(B) hydration;

(C) scheduled and paid rest breaks in shaded or climate-controlled spaces;

(D) an acclimatization plan;

(E) exposure monitoring, and other measures to prevent exposure to heat above safe limits;

(F) covered employee and supervisor training;

(G) hazard notification;

(H) medical monitoring;
(I) an emergency medical response plan;

(J) heat-related surveillance recordkeeping;

(K) procedures for compensating covered employees paid on a piece rate basis for required heat-related rest breaks; and

(L) a heat prevention plan; and

(3) include the requirements described in subsection (b) with respect to covered employers.

(b) REQUIREMENTS.—The final standard promulgated under section 2(b) shall, with respect to covered employers, include the following:

(1) HEAT ILLNESS PREVENTION PLANS.—

(A) IN GENERAL.—A covered employer shall develop, implement, and maintain an effective, written excessive heat illness prevention plan for covered employees of the covered employer, which shall—

(i) for all aspects of the plan, be developed and implemented with the meaningful participation of such covered employees and, where applicable, representatives (including collective bargaining representatives) of such covered employees;

(ii) be tailored and specific to hazards in the covered workplace;
(iii) be in writing, in English and in the language understood by a majority of such covered employees, if such language is not English; and

(iv) be made available, upon request, to such covered employees, representatives (including collective bargaining representatives) for such covered employees, and the Secretary.

(B) PLAN CONTENT.—Each plan required under subparagraph (A) shall include procedures and methods for the following:

(i) Initial and regular monitoring of covered employee exposure to determine whether covered employees are exposed to excessive heat.

(ii) Provision of water, paid rest breaks, and access to shade or cool-down areas.

(iii) Emergency response.

(iv) Acclimatization.

(v) Hazard prevention applying principles of the industrial hygiene hierarchy of controls of the National Institute for Occu-
pational Safety and Health, including, as appropriate—

(I) engineering controls that may include isolation of hot processes, isolation of covered employees from sources of heat, local exhaust ventilation, shielding from a radiant heat source, insulation of hot surfaces, and the provision of air conditioning, cooling fans (including cooling mist fans), evaporative coolers, and natural ventilation;

(II) administrative controls that limit exposure to a hazard by adjustment of work procedures or work schedules, which may include acclimatizing covered employees, rotating covered employees, scheduling work earlier or later in the day, using work-rest schedules, reducing work intensity or speed, changing required work clothing, and using relief workers; and

(III) personal protective equipment which may include water-cooled
garments, air-cooled garments, reflective clothing, and cooling vests.

(vi) Coordination of risk assessment efforts, plan development, and implementation of the plan with other employers who have covered employees who work at the covered workplace.

(vii) Compensating covered employees paid on a piece rate basis for required heat-related rest breaks.

(2) TRAINING AND EDUCATION.—

(A) EMPLOYEE TRAINING.—A covered employer shall provide annual training and education to covered employees who may be exposed to high heat levels, which shall cover the following topics:

(i) Identified heat illness risk factors.

(ii) Personal factors that may increase susceptibility to heat-related illness.

(iii) Signs and symptoms of heat-related illness.

(iv) Different types of heat illness.

(v) The importance of acclimatization and consumption of liquids.

(vi) Engineering control measures.
(vii) Administrative control measures.

(viii) The importance of reporting heat-related symptoms being experienced by the covered employee or another covered employee.

(ix) Recordkeeping requirements and reporting procedures.

(x) Emergency response procedures.

(xi) Covered employee rights.

(B) SUPERVISOR TRAINING.—In addition to the training and education required in sub-paragraph (A), training and education shall be provided annually to covered employees of the covered employer who are supervisors that shall cover the following topics:

(i) The procedures a supervisor is required to follow under this Act.

(ii) How to recognize high-risk situations, including how to monitor weather reports and weather advisories, and not assigning a covered employee to situations that predictably compromise the safety of the covered employee.

(iii) The procedures to follow when a covered employee exhibits signs or reports
symptoms consistent with possible heat illness, including emergency response procedures.

(C) General training requirements.—The education and training provided under this paragraph to covered employees of the covered employer shall meet the following:

(i) In the case of such a covered employee whose job circumstances have changed, within a reasonable timeframe after such change of job circumstances, education and training shall be provided that shall be—

(I) in addition to the education and training provided under clause (ii), subparagraph (A), and, if applicable to such covered employee, subparagraph (B); and

(II) applicable to such change of job circumstances.

(ii) Applicable education and training shall be provided for each new covered employee prior to the job assignment of such covered employee.
(iii) The education and training shall provide such covered employees opportunities to ask questions, give feedback, and request additional instruction, clarification, or other follow-up.

(iv) The education and training shall be provided in-person and by an individual with knowledge of heat illness prevention and of the plan of the covered employer under this section.

(v) The education and training shall be appropriate in content and vocabulary to the language, educational level, and literacy of such covered employees.

(3) RECORDKEEPING.—Each covered employer shall—

(A) maintain at all times—

(i) records related to each plan of the covered employer under paragraph (1), including heat illness risk and hazard assessments, and identification, evaluation, correction, and training procedures;

(ii) data on all heat-related illnesses and deaths; and
(iii) data on environmental and physiological measurements related to heat; and

(B) make such records and data available, upon request, to covered employees and their representatives (including collective bargaining representatives) for examination and copying in accordance with section 1910.1020 of title 29, Code of Federal Regulations (as such section is in effect on the date of enactment of this Act).

(4) WHISTLEBLOWER PROTECTIONS.—

(A) POLICY.—Each covered employer shall adopt a policy prohibiting any person (including an agent of the covered employer) from discriminating or retaliating against any covered employee for—

(i) exercising the rights of the covered employee under this Act; or

(ii) reporting violations of the standard to a Federal, State, or local government.

(B) PROHIBITION.—No covered employer shall discriminate or retaliate against any covered employee for—

(i) reporting a heat-illness-related concern to, or seeking assistance or interven-
tion with respect to heat-related health symptoms from, the covered employer, local emergency services, or a Federal, State, or local government; or

(ii) exercising any other rights of the covered employee under this Act.

(C) ENFORCEMENT.—This paragraph shall be enforced in the same manner and to the same extent as any standard promulgated under section 6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655(b)).

SEC. 4. DEFINITIONS.

In this Act:

(1) COVERED EMPLOYEE.—The term “covered employee” includes an individual employed by a covered employer.

(2) COVERED EMPLOYER.—The term “covered employer”—

(A) means an employer that employs an individual to work at a covered workplace; and

(B) includes a contractor, subcontractor, a temporary service firm, or an employee leasing entity.
21

(3) COVERED WORKPLACE.—The term “covered workplace” includes a workplace with occupational exposure to excessive heat.

(4) EMPLOYER.—The term “employer” has the meaning given the term in section 3 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 652).

(5) EXCESSIVE HEAT.—The term “excessive heat” includes outdoor or indoor exposure to heat at levels that exceed the capacities of the body to maintain normal body functions and may cause heat-related injury, illness, or fatality (including heat stroke, heat exhaustion, heat syncope, heat cramps, or heat rashes).

(6) SECRETARY.—The term “Secretary” means the Secretary of Labor.
